3 .RESULT

4.ADVANTAGES & DISADVANTAGES

4.1.ADVANTAGE:

Profitable for manufacturers and retailers: The constant introduction of new products encourages customers to frequent stores more often, which means they end up making more purchases. The retailer does not replenish its stock—instead, it replaces items that sell out with new items. Accordingly, consumers know to purchase an item they like when they see it, no matter the price because it's not likely to be available for long. And because the clothing is cheap (and cheaply made), it's easy to get people back into stores or online to make fresh purchases.

4.2.DISADVANTAGE:

Critics contend that fast fashion contributes to pollution, waste, and planned obsolescence due to its cheap materials and manufacturing methods. The poorly made garments don't age well, but they can't be recycled because they're predominantly (over 60%) made of synthetics. So when they're discarded, they mold in landfills for years.

5 .APPLICATIONS

A “certified copy” is a copy of the original document signed and dated by the organization that issued the original document, Public Notary, confirming that they have sighted the original.
